

Tyn Dwr Hall

Dimensions

This document has been created to give you clear, practical dimensions for the key spaces across Tyn Dwr Hall. It's designed to support you and your chosen suppliers when planning styling, florals, furniture, lighting and any bespoke elements for your day, helping everyone to visualise scale, flow and placement with confidence.

Tyn Dwr Hall is yours exclusively on your wedding day, and we love seeing couples bring their ideas to life in ways that feel personal and beautifully considered. We're always happy for you to dream, design and collaborate with your suppliers to create a setting that reflects you both.

As a historic country house, the Hall does require a gentle approach. We kindly ask that all installations are free-standing and fully reversible, and that nothing is fixed to walls, ceilings, floors, windows or original features. This ensures the building remains protected for future couples while still allowing your celebration to feel truly yours.

If you or your suppliers are ever unsure whether something is suitable, please do check in with us — we're here to help guide and advise so that your vision can be achieved safely, beautifully and with care.
